Interim Modular Library

[CHALLENGE]

During renovations and new construction of a library in Washington DC, the library district needed a temporary solution for the community to access all media and events.

[SOLUTION]

Modular Genius provided a 6 unit, 4,260 sqft temporary modular library. The large open floor plan allows for rows of books as well as computer workstations throughout the building. People of all ages will have access to the library with ADA aluminum ramps during the 2 years of renovations.
