

2-Story Modular Hospital Addition

[CHALLENGE]

A DC Veterans Hospital needed to expand its administrative space, but in order to maximize campus real estate, the 2 story modular had to be tucked into tight quarters between the existing buildings.

[SOLUTION]

Modular Genius provided 23,740 gross square feet of administrative office space, including private offices, group work stations, conference space, work flow circulation, break rooms, toilets, janitorial facilities and all adjunct facilities
