

## Radio Station Trailer

### [CHALLENGE]

A public radio station on Maryland's Eastern Shore was in need of transition space during renovations, after which the University location would continue to use for student education.

### [SOLUTION]

Modular Genius installed a 56' x 12' modular radio trailer on campus including electricity, lighting, heating, cooling, ventilation, and communication. Wooden decks, ramps, and canopies connect the modular to an adjacent building. The project was completed in 60 days.
