

## Adult Training Center

### [CHALLENGE]

A power company had to relocate their existing power pole training offices and classrooms. The space which they were using was old and out dated. They needed to move out and be up in operational in a short period of time for seamless transition.

### [SOLUTION]

Modular Genius installed 1,728 sq ft of classroom and office space for their new facility. The additional services provided by Modular Genius included demo of the existing modulares, installation of prefabricated aluminum decks, ramps and canopies, skirting and accordion partition walls to divide the classrooms inside the modular building. The fabrication and installation was complete in 60 days for award.
