

Assembly Use/United States Army

[CHALLENGE]

The US Army was updating facilities on an isolated island which required a 2,160 Square foot cafeteria/ command center for troops training. The building had to be delivered and installed at the remote location in between exercises so as not to disrupt the training.

[SOLUTION]

Modular Genius, Inc. constructed, delivered and installed the 2,160 square foot facility in 45 days. Work consisted of the building being installed on a foundation, with site-built entrance stairs. The project was delivered on time and within budget.
