

Medical/Healthcare

Community Healthcare Facility

[CHALLENGE]

A small rural community was in need of local healthcare and applied for a Federal Grant to support their vision of bringing healthcare close to home. The dream came true when the grant was approved. The facility had to be up and operational in a matter of months to comply with the Federal Grant.

[SOLUTION]

Modular Genius worked with the community to design and build the healthcare facility that met their specific needs and fit within the budget of the grant. A 2,772 Sq Ft modular building was built delivered and installed on site in approx 60 days from time of contract. Modular Genius provided complete electrical, sewer and water connections to the building. All foundations, concrete stairs, ramps and canopies were also constructed within the 60-day window.
