

# MODULAR GENIUS

SMART BUILDING

## Fitness Center/Health Spa

Boca West, Florida

### [CHALLENGE]

A national general contractor was in need of an office complex on the job-site for a large fast paced project. They needed to staff over 50 personnel during the multi-year project on site.

### [SOLUTION]

Modular Genius designed, built and installed 4,200 square-feet of modular buildings for the project.

To Whom It May Concern:

It is without hesitation that I share with you my appraisal of Modular Genius' performance with installing our temporary fitness and spa facilities.

They were on schedule and on budget from the beginning. Their professionalism and knowledge of our needs made the project very easy on the owner.

At Boca West, we have a proven track record of commitment to the updating and modernization of all of our facilities and our current project of building a new 65,000 square foot spa is the latest example of this commitment. One of the keys to our success has always been to maintain service to our members with as little inconvenience as possible during all of our construction projects. Modular Genius was immediately on board with our philosophy and designed a temporary facility that has proven to be better than many permanent structures! Our members have been more than pleased with their interim fitness center and spa; therefore, we have been more than pleased!

They have been a pleasure to work with and it would be my pleasure to personally discuss our relationship with you personally. Please feel free to contact me should you need further information.

Sincerely,

Herb Romanow  
Assistant General Manager
