

## Temporary Prefabricated Medical Building

### [CHALLENGE]

A Hospital was planning major renovations. They were needed to keep the operation running during the process and planned to move some exam rooms and office space out into a modular building.

### [SOLUTION]

Modular Genius worked with a medical design professional and built the temporary modular healthcare facility that met their specific needs. A 1,440 Sq Ft modular building was built delivered and installed on site in approx. 60 days from contract to completion.
