

Modular Weight Room / Excessive Building

[CHALLENGE]

A U.S. National Park we in need of a building to house free weights and exercise equipment. They decided that a modular building they could lease would give them the most flexibility with schedule and budget.

[SOLUTION]

Modular Genius constructed a modular building with increased floor loads to hold the weights and equipment. A 1,440 Sq Ft modular building was built delivered and installed on site in approx. 90 days from contract to completion.
