

### Government

## Modular Office Cabins

### [CHALLENGE]

A Government agency in Alaska was in need of modular offices at a remote location. Transport was not accessible by road and the buildings would need to be shipped in by barge.

### [SOLUTION]

Modular Genius provided two 40' x 10' modular office buildings that were sent from Indiana, to Seattle to Juneau, and then to the final location. The units included laminate wood flooring, conference room with a kitchenette, and a restroom. The project was completed in about 60 days.
