

Modular Building Research & Learning Studio

[CHALLENGE]

A Montessori School wanted to provide their students and teachers a beautiful new space to work, study, and interact in new and different ways. Tall ceilings, movable walls, and plenty of windows was required.

[SOLUTION]

Modular Genius and its affiliates produced a LEED qualified Design Build modular campus on a highly accelerated time schedule. The two green buildings were 6,480 sqft and connected with decking to create a changeable and adaptable environment both indoors and out.
