

Charter School Modular Classroom Complex

New Castle, DE

The Challenge

The Charter School of New Castle in New Castle, Delaware faced a critical challenge due to increased enrollment, resulting in a shortage of space for their elementary and middle school programs. This posed a significant obstacle to providing quality education and meeting the demands of the growing student population. Failure to address this challenge would have compromised the school's ability to deliver effective education and comply with enrollment requirements.

The Solution

Modular Genius designed and built a turnkey installation of over 9,600 square feet of modular space, featuring eight classrooms, eight private offices, single occupancy as well as multi-person restrooms, and a breakroom with kitchen for staff. The modular classroom complex designed for the elementary school students feature child restrooms and exterior doors in each classroom. The new modular classrooms were designed to be functional, durable, and easily accessible for all students. As such, ADA compliant ramps and steps were installed.
