

Public High School Modular Three Classroom Complex

Troy, MO

The Challenge

Troy Buchanan High School in Troy, Missouri needed additional classroom space to accommodate increasing student enrollment. The school required a fast, cost-effective solution that could be installed with minimal disruption to ongoing classes. The new building needed to meet local educational standards and comply with state building regulations while providing a comfortable and durable learning environment.

The Solution

Modular Genius provided a 3,564 sq ft modular building featuring four fully equipped classrooms. The building was designed and constructed offsite, ensuring quick installation on campus within just 11 days. The structure was compliant with all local building codes and included appropriate safety features, HVAC systems, and ADA compliant steps and ramps. This expedited solution provided Troy Buchanan High School with a high-quality educational space, allowing the school to meet its immediate needs without compromising on standards or causing extended disruptions.
